Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30 day MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

Claims 1-128 are pending in this Action.

**Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-42 and 115-128, drawn to the process of monitoring a browser's interactions with a server arrangement, classified in class 709, subclass 224.
- II. Claims 43-78, drawn to the process of creating content of a response enabling a browser to generate a page from information recorded in database and/or drawn to the process of caching, classified in class 709, subclass 213.
- III. Claims 79-114, drawn to the process of providing or rendering assistance via a customer service interface by a customer service representative to a user or is drawn to the process of providing a customer service interface providing assistance and/or customer service to users, classified in class 709, subclass 205.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as creating content of a response by generating a page from information recorded in a database. See MPEP § 806.05(d).

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

Art Unit: 2151

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed (invention III) is directed to the process of providing a customer assistance to the users by a customer service representative through a customer service interface. The subcombination has separate utility such as monitoring a browser's interactions with a server arrangement.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed (invention III) is directed to the process of providing a customer assistance by a customer service representative through a customer service interface to the users. The subcombination has separate utility such as creating content of a response by generating a page from information recorded in a database.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, hence it creates serious administrative burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Art Unit: 2151

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

**Conclusion**

A telephone call was made to Jack D. Todd on June 21, 2005 to request an oral election to the above restriction requirement but did not result in an election being made.

In accordance with 35 U.S.C. 133, a shortened statutory period of one month (not less than 30 days) is hereby set forth to this Office Action. See MPEP § 710.02(b).
